

HIT CONNECTOR

Board-to-wire

The HIT connector is multi-circuit and miniaturized for ECU for the automobile.
Female connector is divided into seven housings, and considers the ergonomics and workability.

Features

●Multi-circuit structure, Miniaturized

Current products available are up to 180-circuit. Although this connector is multi-circuit, it was miniaturized by narrow pitch. The insertion force in the mating operation of one time is decreased by block division structure.

●Reliability

It conforms to the automotive performance evaluation standard.

●Diversity

It is hybrid structures of using 0.64mm and 2.8mm terminals. Large current circuit is also available.
